April 17, 2020 is World Hemophilia Day.

The longevity of this celebration is proof of the dedication and tight-knit nature of our community. The theme of World Hemophilia Day in 2020 is “Get+involved”. It’s a call to action for everyone to help drive the WFH vision of “Treatment for all” at the community and global level. Everyone can play a part—from patients, family members, and caregivers, to corporate partners, Hemophilia Treatment Centre (HTC) volunteers and those who support their national member organization (NMO). We want to encourage everyone to “Get+involved” and help increase the awareness of inherited bleeding disorders and the need to make access to adequate care possible everywhere in the world. Engage with local media, or get involved in regional activities on this special day. If you’re showing support, you’re playing a part in the goal of Treatment for All.

Join us once again in showing your support to the global bleeding disorders community by taking part in the World Hemophilia Day Light it Up Red! campaign. Last year, thousands of people worldwide united to show their support by lighting up over 70 major landmarks in cities across the world. We invite you to take a part in this initiative by encouraging a local landmark (big or small) to light it up red. Post photos and engage with the bleeding disorders community on our social media pages and share what World Hemophilia Day means to you!
