Precision BioLogic Lights It Up Red in Support of World Hemophilia Day

For Immediate Release

HALIFAX, April 17, 2018—Precision BioLogic is pleased to support the World Federation of Hemophilia (WFH) and World Hemophilia Day. In recognition of World Hemophilia Day 2018, Precision BioLogic is lighting its offices up in red and encouraging everyone to visit the WFH eLearning Platform to learn more about hemophilia and other bleeding disorders.

World Hemophilia Day offers an opportunity to help people with bleeding disorders live healthier, longer and more productive lives by educating and empowering them through knowledge sharing, information exchanges, education, and training. Today, the global bleeding disorders community and the World Federation of Hemophilia (WFH) come together to promote and encourage Sharing Knowledge and the role it plays in building a stronger community.

“2018 marks Precision BioLogic’s sixth year as a corporate supporter of World Hemophilia Day. We’re very proud to be able to support this important event and other initiatives of the WFH,” says Paul Empey, President & CEO of Precision BioLogic.

For more information about the WFH and World Hemophilia Day, visit www.wfh.org.

About Precision BioLogic

Precision BioLogic is a privately-held company that develops, manufactures and markets specialized products used by medical professionals and researchers around the globe to diagnose coagulation disorders. Precision BioLogic also has several active initiatives with pharmaceutical partners who seek to ensure that the diagnostic implications for their novel therapeutic agents have been well characterized.
