### Principles of care: **WHAT YOU NEED TO KNOW**

12 guiding principles of care that aim for ideal hemophilia management to ensure that people with hemophilia have access to appropriate, sustained, and high-quality medical services and comprehensive care

(It should be recognized that the priorities and capabilities in each country determine what is practical at any point in time)

Principle 1	<b>National coordination and delivery of hemophilia care</b>
Principle 2	<b>Access to safe CFCs, hemostasis products, and curative therapies</b>
Principle 3	<b>Laboratory services and genetic diagnosis of hemophilia</b>
Principle 4	<b>Education and training in hemophilia care</b>
Principle 5	<b>Clinical and epidemiological research</b>
Principle 6	<b>Acute and emergency care for bleeds</b>
Principle 7	<b>Multidisciplinary care for hemophilia</b>
Principle 8	<b>Regular replacement therapy (prophylaxis)</b>
Principle 9	<b>Management of patients with inhibitors</b>
Principle 10	<b>Management of musculoskeletal complications</b>
Principle 11	<b>Management of specific conditions and comorbidities</b>
Principle 12	<b>Outcome assessment</b>
